

We are Proud to Announce our New Certified Mold Training

Why Study Mold?

Homeowners really can't see or smell Asbestos or Lead. They can see and smell mold – and they don't like it. Mold represents an opportunity for you to add new business while helping people out. Taking a certified course let's your customers know you know what you are doing.

Certification

The Midwestern states do not yet have a standard for Mold Remediation. Therefore we teamed up with E.S.A to bring you the new Virginia Certified training. Virginia is the first jurisdiction to have a series of approved courses teaching the fundamentals of Mold Remediation Work, Supervision and Inspection.

Also – course approval began on 7-1-2011, so you know this is the most up-to-date information and techniques available.

Class Schedule

MOLD REMEDIATION WORKER

2 Day Class 8:00am – 5:00pm **\$395**

This comprehensive 16 hour course includes 6 hours of hands-on work. It is meant for those actually doing the work, and everyone who wants to understand the problem and see the steps involved in the actual remediation process.

Future dates TBD or call to set up a private class.

MOLD SPEC WRITER

1 Day Class 8:00am – 5:00pm **\$245**

After assessment and before remediation, a proper plan must be given to the remediation contractor to follow. This course covers creating that action plan, plus report and grant writing. Each company should send at least one person to this course. PLUS: learn how to market your service.

March 1, 2012-Dane County

MOLD REMEDIATION SUPERVISOR

3 Day Class 8:00am – 5:00pm **\$595**

Topics include all the information included in the Worker course, PLUS: responsibilities and roles of a Mold Supervisor, Mold hazard reduction methods/options, extensive hands-on training, occupant protection plans, inspection and risk assessment report interpretation, project management, recordkeeping, and legal / insurance issues.

In virtually all situations, a mold supervisor is needed ON SITE. At least one supervisor is recommended for each company.

Future dates TBD or call to set up a private class.

MOLD INSPECTOR

2 Day Class 8:00am – 5:00pm **\$495**

Learn the basics of mold and how to identify it. Learn how to safely take samples and interpret the results of a Lab Report. Understand relevant regulations and guidelines. Get hands-on experience using the proper equipment. Learn to conduct post-remediation verification and complete a report. You will be given forms to use in the field. **February 28-29, 2012-Dane County**
